Cornell CALS PRO-DAIRY Online Course **Dairy Cattle Reproductive Management**

Have you...

...worked with dairy cows and are looking to increase your knowledge of reproductive management?

...had some formal training or course work but want a refresher on reproductive management?

...been working with the farm repro program but want to know more about the how, what and why?

...wanted to improve the reproductive performance of your herd but need to know where to start?

...wanted to increase the skills you bring to the farm or your farm employer?

...been wondering where you'll find the time to attend a course or workshop?

If so, this course is designed for you. You'll learn the basics of reproductive management, and then quickly build from there.

Who should attend:

Dairy business on-farm personnel (owner or employee) who are seeking to increase their knowledge of dairy reproductive management. Participants should possess a formal or informal background in dairy cattle management, but not necessarily in reproductive management.

- Anatomy and Physiology
- Synchronization Protocols
- Breeding Strategies
- A.I. Techniques
- Monitoring Reproductive Programs
- Heifer Reproduction Management

Cornell CALS
College of Agriculture and Life Sciences

Program Details:

This is a seven week course offered online. Corresponding assignments are due each week. To get the most out of the experience, you should expect to spend two to three hours per week on the lessons and assignments. The course is offered through Moodle, an easy-to-use online interface that you'll view through your personal computer's web browser.

You do not receive Cornell University credit for taking the course. Rather, you will receive a certificate of completion from Cornell PRO-DAIRY.

Webinars:

The bulk of the course happens on your own time, with discussions, readings, and assignments in MOODLE, our virtual classroom. Webinars will be woven into the online interface of the course, to allow you to meet on a weekly basis and learn from the presenters and ask questions in real time.

Dates and Costs:

Oct 30, 2017 through Dec 15, 2017

Registration fee: \$265.00
(\$25 early bird discount if registered before Oct 15, 2017)
