MSU is an affirmative-action, equal-opportunity employer, committed to achieving excellence through a diverse workforce and inclusive culture that encourages all people to reach their full potential. Michigan State University Extension programs and materials are open to all with regard to race, color, national origin, gender, gender identity, religion, age, height, weight, disability, political beliefs, sexual orientation, marital status, family status or veteran status. Persons with disabilities have the right to request and receive reasonable accommodations.

### WHO SHOULD ATTEND:

Elected and appointed officials at all levels of local government, as well as interested local government staff and residents.

### DESCRIPTION:

Since chronic wasting disease (CWD) was first detected in Michigan in 2015, 181 deer have tested positive for CWD across 8 lower peninsula Michigan counties and 1 upper peninsula county. The Michigan Department of Natural Resources has instituted a variety of regulations to help manage the spread of CWD but there is more that can be done through local government engagement.

This webinar will include a presentation by MSU Extension CWD Educator Katie Ockert. This presentation will help participants understand how the DNR regulations help manage the spread of CWD, how you can help bolster community buy in to those regulations, and share additional options for further local action.
