

AQUATIC WEED CONTROL

Short Course

UF IFAS Extension
UNIVERSITY of FLORIDA

Need CEUs? Seats still available!!!

The primary mission of the UF IFAS Aquatic Weed Control Short Course is to provide educational opportunities and CEUs for Florida’s licensed pesticide applicators. Due to COVID-19 restrictions, the 2020 Short Course, which will take place October 28-30, will be delivered virtually to sites throughout Florida. **The Hardee County Extension Office, located at 507 Civic Center Drive, Wauchula, FL 33873, has been selected as a host site, with Ajia Paolillo and Jonael Bosques supervising Short Course attendees at this location.** Presentations will be pre-recorded and streamed at the scheduled time, and speakers will participate in a live Q&A session.

You’ll earn 20 FDACS-approved CEUs by attending the 2020 Short Course. Regular registration ends September 18, so visit the Short Course webpage at <https://conference.ifas.ufl.edu/aw/index.html> today!

Please note: All attendees will be required to abide by CDC and UF health and safety guidelines, which include social distancing, personal hygiene, and MANDATORY mask usage at all times. Current State of Florida guidance strongly encourages individuals 65 or older or those with underlying medical conditions (including chronic lung disease, moderate-to-severe asthma, serious heart conditions, immune-compromised status, cancer, diabetes, severe obesity, renal failure and liver disease) to avoid crowds and in-person events at this time. Individuals who have special needs that prohibit the wearing of a face covering but feel they must attend this Short Course should contact Dr. Gettys (lgettys@ufl.edu) to discuss alternative means of participation.

We greatly appreciate the generous support of our sponsors. These industry leaders make the Short Course possible, and we couldn’t do it without them!
